FOR IMMEDIATE RELEASE

Storage Engine Announces Order from Northrop Grumman

Tinton Falls, New Jersey, September 28, 2004—Storage Engine, Inc. an innovative provider of and fault tolerant information systems and document imaging solutions, today reported that it has received an order through Northrop Grumman for its Synchronism Data Storage Appliance product totaling approximately \$370 thousand. The Company expects to ship the product within the next several weeks for implementation with an important U. S. Government application.

About Northrop Grumman Information Technology:

Northrop Grumman Information Technology, headquartered in Herndon, Va., is a trusted IT leader and premier provider of advanced IT solutions, engineering and business services for government and commercial clients. The company's technological leadership spans such areas as homeland security solutions, secure wireless, cyber and physical assurance, IT and network infrastructure, managed services, knowledge management, modeling and simulation, and geospatial intelligence solutions.

About Storage Engine, Inc. (SEI):

Storage Engine (SEI) is a skilled provider of innovative data storage solutions, and document imaging solutions for enterprises and departments that serve a wide range of business and government markets along with a wide range of other services to enable the capture, tracking, storing, sharing and utilization of information assets cost effectively. We provide fault tolerant information systems that store, protect, manage and replicate data in complex networks with greater ease and superior cost savings. The Company's Synchronism product line, as well as its Synchronix[®] product line and the Raven[®] systems, are modular units that can be configured and stacked to meet customers' specific and expanding data storage requirements. SEI sells its products through its direct sales force and a network of qualified systems integrators and resellers.

SEI competes against companies such as EMC (NYSE:EMC), Network Appliance (NASDAQ:NTAP), Sun Microsystems (NASDAQ:SUNW) and Xerox (XRX), among others. The Company distinguishes itself in the marketplace via the superior cost/performance ratio of its high-quality, fault-tolerant products and satisfied customers. Trademarks mentioned herein may be trademarks and/or registered trademarks of their respective companies.
